Technology at work for you

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

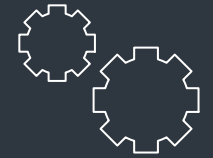

Investment in Indian R&D is estimated to be more than Rs.50000 Crs. As on date most of R&D projects are concentrated in some specific specialized sectors and industries. Majority of the R&D projects take a back seat because of lack of financial resources. With a view to promote niche R&D at the grass root level. Government of India provide sufficient funding to mobilize these high net worth R&D projects through DBT, DST, TDB and other government funding agencies.

In the Union Budget 2011-2012 Government has allocated almost Rs 5679 Crs for R&D and technology up gradation schemes through various departments like DBT (Rs.1400 Crs), DST (Rs.2349 Crs) & DSIR (Rs 1930 Crs).

Vajrakavach

identifies your exact need and the Potential of growth of your R&D project. We suggest your organisation the most appropriate solution to accomplish your dreams.

We offer services to complete formalities to generate required funding for the dream R&D projects. From the government / funding agencies.
